

An aerial view of a highly detailed LEGO city, likely from the Lord of the Rings set. The city features various structures, including a large central tower with a blue and white spiral design, and numerous smaller buildings and walls. The scene is set against a backdrop of a hazy, mountainous landscape.

GAME WITHOUT THRONES

AGILE ORGANIZATION BUILT FROM LEGO

What's an Agile Organization?

- › eXponential return
- › Simple design
- › Continuous throughput
- › Autonomous teams
- › Learning triple-loop
- › Ecosystems thinking

www.xscalealliance.org

eXponential
return

- › Products are service ecosystems
- › Product return curves are sigmoids
- › Don't chain the curves; stack them

- › Design means the elegance of minimum
- › Not look and feel; how the ecosystem works
- › Design, Delivery & DevOps hand-in-glove

Simple
design

- › At one time there's **one** bottleneck constraint
- › Work on other constraints is premature
- › Because it can't increase **Throughput**

Continuous
throughput

- › Self-organizing teams don't have masters
- › Self-managing streams don't have owners
- › Leadership as a Service + Chapter Meetings

Autonomous Teams

- › Learning What, How & How to learn How
- › Self-Organizing Transformation: Steel Threads
- › Continuous Delivery x Continuous Learning

triple loop Learning

- › Ecosystems are networks of mutual benefit
- › Whole board: think globally, act locally
- › Avoiding hill-climbing: iterative and **reductive**

Ecosystems
thinking

What's the difference between Agile Organization and some other kind?

- › No Command & Control
- › Maximum Meeting Size = 5
- › Collaboration Loop Limit = 4

Collaboration Loops are conversations needed to get two people to work together.

The Collaboration Loop Limit is the maximum length Collaboration Loop in some group of people.

Question:

- › Noble houses can't build; they're busy fighting
- › Wildlings barter engineering to avoid fighting
- › Wildlings work as a **holarchy**, not a **hierarchy**

Why would
Wildlings
build a Castle?

Answer:

No one else can

- › 5 person squads
- › Each member has a different chapter
- › Each chapter has a different metric

Thenns, Giants, Frozen Shore, Ice River Clan, Cave People ...

Squads

Chapters

> Chapters cross-link the squads

The Artist: metric is geometric and scale symmetry. Focuses breadth-first, never losing sight of the whole.

The Architect: metric is enclosed volume. Focuses on reusable practices, tools and building techniques

The Merchant: metric is # of different rooms. Focuses design on experiences of high-born lords and ladies

The Maester: metric is sturdiness. Integrity vs winter, wobbles and walkers. Focuses on root causes.

The Coach: metric is balance – the multiple of all the other metrics. Focuses work on the current bottleneck.

- › No more than 4 Squads per Stream
- › Each Stream builds separately
- › Integration is via “Treaty Chains”
 - › Squad to Squad
 - › Stream to Stream

Streams

Our Four Ceremonies

Five minutes per ceremony

- › **Sprint**: each squad builds castle **Features**!
- › **Chapter Meeting**: coordinate squads, propose **Treaties**!
- › **Stream Refactoring**: integrate features into the castle
- › **Retro**: improve workflow & accept/modify **Treaties**

The Small Council meets during **Refactoring**

- › Squads make decisions by unanimous consensus
- › Unless the Coach says that's taking too long – if so:
- › The Coach taps the role that best fits the decision
- › The Coach never makes the decision themselves

Leadership as a Service

- › Chapter Meetings each pick a **leader – rotating!**
- › **Leaders** form a Small Council per release cycle
- › Resolves cross-cutting concerns & feature **priorities**
- › The **Coach-Chapter Leader** coaches the Council

The Small Council

Sprint Zero

Brainstorm & Prototype Whole Castle Layout

- › Work only in your squad's area: **don't attempt** to integrate your work with the other squads yet!
- › Autonomy: focus on getting **efficient workflow** into your own squad during this initial sprint
- › Breadth-first thinking – **experiment and adapt**. Sketchy and weird ideas are welcome!

Chapter Meetings: Proposing Treaties and Features:

Treaty: If the Crows will work on
foundations of the wall ...
The Frozen Shore Clan will
build towers on either side ...

Feature: As a Dragon
In order to live under the castle
I want a basement cave & exit

Learnings

Problems

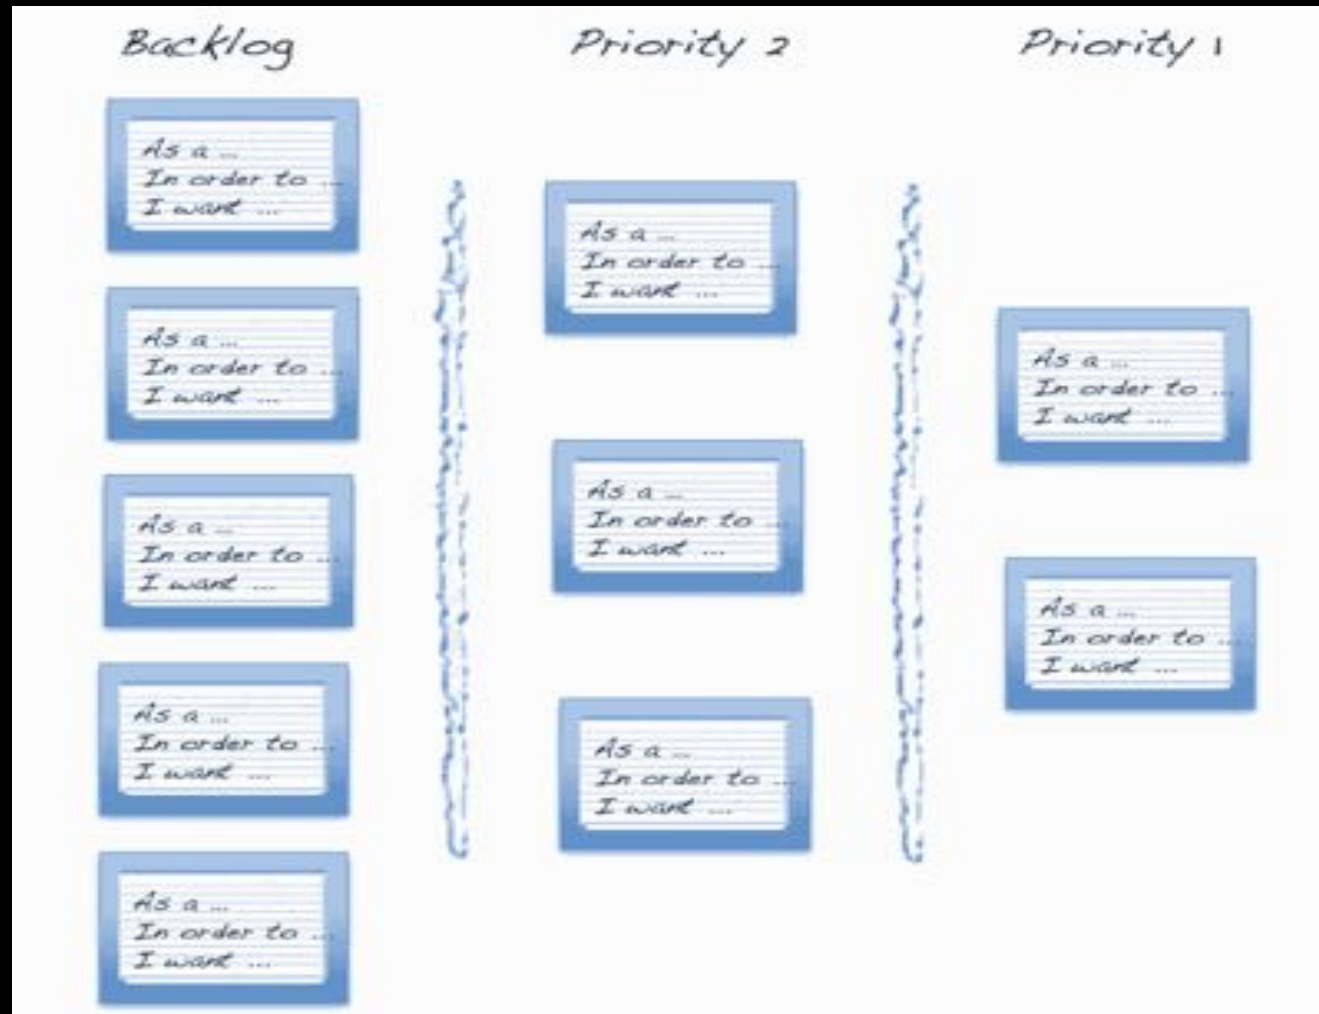

Proposals

Mob Refactoring & Small Council

While the Small Council prioritizes New Features

Their Stream Refactors finished work into the Castle

Squad Retros: Reject or Accept Treaties

And identify & fix
squad workflow problems

Sprint One

Each squad picks the highest priority Feature (finish one **before** picking another)

- › **Build it** in your own area: **Don't** attempt to refactor your work into the Castle yet!
- › **Autonomy**: focus on improving your particular metric in your own squad during this sprint
- › **Non-interference**: don't worry about what the other squads are doing yet!
- › **Don't** add to or remove Lego from the Castle!

Chapter Meetings: Proposing Treaties and Features:

Treaty: If the Crows will work on
foundations of the wall ...
The Frozen Shore Clan will
build towers on either side ...

Feature: As a Dragon
In order to live under the castle
I want a basement cave & exit

their Castle

Stream Integration

Council members
Integrate all
Stream Castles into
one great big one.

The rest of us make
decorations for it.

Take Photos But
Beware the Dragons!

An unretouched photo of what happens when we try to
Integrate big chunks of Lego without being **very careful**!

Portfolio Integration

Stream Councils split
into Chapters
Stream Chapters each
pick a Leader
Leaders form a
Portfolio Council
Take Photos But
Beware the Dragons!

An unretouched photo of what happens when we try to
Integrate even bigger chunks of Lego without being *very careful*!
